Hi Sean and David,

Seems like you've picked a super interesting project for 244! Excited to see what you find!

I think in terms of work, reproducing only the client-side part of this paper would be sufficient. Would be the more compelling bit of data anyways, since you would not be able to run the server-side measurements for too long. If you have time or interest, you're of course welcome to do the server-side part as well.

Looks like the openintel dataset is still available, and you're welcome to use it for the bulk of the reproduction. If you do this, I would suggest spending a bit of time making your own measurements to validate the dataset. You'll learn a ton and it'd be good to prove to yourself that the data is trustworthy.

Thanks!

Bruce
